Laidig is an engineering and manufacturing company, providing custom-engineered material handling systems that are known throughout the industry for their quality and durability. Laidig has pioneered the development of automated storage and reclaim since 1961, and is a noted provider of dry-bulk silo reclaimer systems around the world. They design, market, manufacture, and service a wide range of storage and reclaim systems, and excel in providing customized solutions for materials with special handling requirements, especially those that require exceptionally rugged, extreme-duty reclaimers. Their research and testing has resulted in the development of systems that are well-suited for the storage and reclaim of grain meals, whole grains, wood chips, sawdust, recycled materials, cement, fly ash, FGD Gypsum, coal, powders, biomass and other hard-to-handle bulk solids. Further information about Laidig can be found at laidig.com.

Laidig offers a generous benefit package including a matching 401k, health, life, dependent life, AD&D, disability, H.S.A., dental, & vision insurance, paid time off, & paid holidays.

Required education:

- High school or equivalent

Qualified individuals should send their resumes to Susie Sheridan-Hall, Human Resource Manager, susiesheridanhall@laidig.com.
